

It occurred to me this morning that planning and decision making were two of the biggest ~~weaknesses~~ weaknesses that I have. Not only do I not pay bills every month - "What's my month?" - I am unable to plan vacations or intelligently "leave time actual". It would be fun going white rafting or fishing down a main river, or on a sailing boat, or traveling, etc. etc. Actual, I am better now than I used to be - but still pretty poor.

Bad planning is having a house which is filthy and looks like shit because I don't hire someone to clean for \$15.00 per week. That, in turn, results in my not inviting people over and fully enjoying the house.

This last year I have gone to England & Ireland, Florida in the Sun, Nicaragua & Man.

Poor planning is not getting the car fixed, etc.

- (1) Should I run for Governor?
- (2) The major issues facing the city.
- (3) Where should we be one year from now?
